Vela Family: A Winged Slabserif

The Vela text typeface was created by the German designer Holger Königsdörfer, initially as part of his final project at the University of Applied Sciences in Augsburg. It was developed in an elaborate process of experiments including calligraphy, printmaking and photography in which he searched for new letterforms to integrate into his typeface. The outcome is Vela, a vigorous but still «winged» slab-serif.

This typeface family bundle is an updated and optimized version that consists of four fonts: Regular and Bold (including Small Caps), and Italic and Bold Italic (including Swash Capitals). These fonts support all European languages and provide an extended character set. Additional glyphs such as various figure sets, currency symbols, swashes, ligatures and alternates make the Vela Family suitable for many different fields of high-quality typography.

The Miserable Thing About Software

The font software has been tested by lazydogs typefoundry in all conscience. The functionality of font-software though is strongly dependent of the application using it and additionally installed software tools. Possible conflicts with installed software may occur and cannot be prevented. For information concerning this matter please consult this documentation or contact us for further questions.
